

RX SMART COFFEE ICO REPORT

October 1, 2017

OVERVIEW

1. Why a Token and an ICO for this Project?

Combining a token with our product through a crowdsale (ICO), allows Distributor/Reseller/Associate on our system to build a global Social network of Rx Smart Coffee early adopters and investors who will actively work to educate and spread awareness of our networking marketing platform for global distribution of our national known blends: **Gentlemen's Blend, Thin Blend, Beautiful Mind, Heart Smart and Fresh Breeze**. Source- <https://supplementpolice.com/rx-smart-coffee/>

2. Type of Raise for This Project

Uncapped - there is no specific amount desired to raise. The sole objective of this ICO is to bring an international awareness of our coffee blends. However, a modest dollar raised will help us move the business plan and does not qualify us as a failed project. The natural value of RxSmartCoffee token is built on the incentive to invite others to enjoy our coffee products with friends and family. The community in our social networks who participate in our token crowdsale have the additional incentive of a gain on the value of their asset.

3. Important Requirements to Participate in RXSC ICO

RxSmartCoffee token (RXSC) is a Waves based decentralized token that represents Rx Smart Coffee Inc's assets. Rx Smart Coffee has selected Waves as the platform of choice to create Rx Smart Coffee's token due to its simplicity, friendly environment and its robust infrastructure tailored to nontraditional cryptocurrency users. Under the tab [Portfolio](#) inside the [Waves Lite Client](#) you can find all [Assets](#), [Cryptocurrency](#) and/or [Fiat](#) that you're holding inside your wallet. [The DEX](#) allows you to buy, sell or exchange every asset existing within the Waves Platform.

Please read [general instructions on how to use the waves platform](#)

- Create your wallet at <https://waveswallet.io/>. Don't forget to save a password and, most importantly, a SEED phrase to restore the wallet. You can find more details on how to register [in a separate manual](#).
- The minimum amount to top up your bitcoin wallet of the Waves account is 0.01 BTC + transaction fee. If you send a smaller amount, bitcoins will not be credited to the wallet.
- Before creating a buy order for RSXC, please make sure that you have enough Waves. The fee to create one buy order is 0.003 Waves. The fee to transfer any tokens within the platform is 0.001 Waves.

4. Is RxSmartCoffee Token a Verified Asset on WavesDex?

No. The Waves Platform allows everyone to [issue](#) his or her very own custom blockchain token in literally two clicks. As you can see in the [Waves Lite Client](#), some of the [Assets](#) are accompanied by a **green mark** next to their name. Custom blockchain tokens with a green mark have been verified and approved by the community. Most of the coins on the Waves platform aren't accompanied by a green mark, this doesn't imply that those tokens aren't tradable or that something is wrong with the coin. It only means that the Waves team has not yet verified or approved the Token. Please bear in mind when trading non-approved Tokens, you double check the asset ID. RxSmartCoffee (RXSC) asset ID - [SGBHnkG1Z8VbEtaCF5gpNihg1SRFky6CzrwmyL8GJnj](#). Source- http://www.waveswiki.org/index.php?title=Verified_Assets.

Once RXSC token is accepted it gets added as a verified token to the GUI in the next GUI update. When this is done, you can see RxSmartCoffee token on the DEX with a **green checkmark**!

5. Instructions for participating In ICO on WavesDEX

Only Tokens Accepted for Crowd Sale:

WAVES, BTC, ETH, MGO, WGO, BCH

Roughly 80 million tokens will go on sale to the public for \$ 0.66 on the WavesDEX. The sale period will last for 30 days on the Waves Decentralized Exchange. If you are buying RXSC token on the WavesDEX, you will take immediate possession of your asset. However, an example was given by one of the Waves Community support team which explains, “the major disadvantage for immediate *control* is that DEX is built in so that traders can immediately outplay you once the price fluctuates”.

The example given, “say your sell wall is set for 100k tokens at *x \$BTC/\$WAVES price* so I buy at the moment, your wall is up and for the example purpose let’s say 1 BTC gets me 100 of your RXSC tokens. Now, your wall went up BTC was \$4k so each of your tokens was valued at \$40. 12 hours later BTC is \$3500 so your token is automatically worth \$35 the investor that participated first is already at a loss so each time the \$ value fluctuates your investors are the ones feeling the pain and investors that were fortunate to buy when the value was lower they immediately have the option to sell to others for a gain outbidding your set wall”. Source- <https://wavesplatform.slack.com/archives/D72627BS4/p1505351178000143>

So, investors who participate in the ICO on the WavesDEX must pay close attention and if you can help it, hold on to your token until the ICO is completely over. This would show respect to the protocol and to your fellow investors.

6. Instructions for participating In ICO on [RxExchange.us](https://rxexchange.us)

Approximately 80 million tokens available will go on sale to the community for \$ 0.33 on <https://rxexchange.us/>. The sale period will last for 30 days on [RxExchange.us](https://rxexchange.us)

Only Tokens Accepted for Crowd Sale:

WAVES, DIBC, OMNI

Participants will be able to purchase RXSC token with a **Visa** and **MasterCard**.

- 5000 DIBCOIN limit per transaction
- 6000 RXSC token limit per transaction with **Visa** and **MasterCard**.
- During ICO you can only buy RXC, you cannot sell it.

**The RxExchange.us site is not yet ready for public use and we will announce 2 days prior to ICO when participant can register for preparation of the ICO on 10/06/17.*

We will send your RXSC asset tokens to the same address on file in 1-3 business days after the ICO (10/06/17-11/6/17). No additional fees are applied to ICO orders. You'll be charged for 0.3% only; this is our regular exchange fee.

7. Doing a Transaction on [RxExchange.us](https://rxexchange.us)

Although change addresses play a key role in improving your privacy, they can also lead to confusion, loss, or theft when not understood, especially when new to crypto. All asset (Bitcoin) transactions addresses are considered a reference number for each transaction done on [RxExchange.us](https://rxexchange.us). This includes, DIBCOIN, WAVES, RXSC, & OMNI transactions. For the ICO, always use the same address use in the initial (first) transaction so we can send your assets back to the same address. This help keeps an accurate account of participants for audit purposes.

USE A SINGLE ADDRESS TO RECEIVE BOTH PAYMENTS AND CHANGE.

In the result of normal wallet operation, **Failure to Monitor Change Address can result in loss funds.** Set a label for [RxExchange.us](https://rxexchange.us) during the ICO so you can keep track of which addresses you've used for to participate in the initial crowd offering. We need to send you back your asset to the same address we have on file. Please take this seriously.

8. [Trading Terms and Privacy](#)

It is important to us that you, and our other visitors, have the best possible time while using our site, and that when you use [RxExchange.us](https://rxexchange.us) site you are fully aware of our respective legal rights and obligations. For that reason, we have created these Terms of Use as the legally binding terms to govern your use of [RxExchange.us](https://rxexchange.us) site. Please read these Terms of Use carefully before using the site because they affect your legal rights and obligations. Please read trading and privacy terms here [Trading Terms](#).
